PROFESSIONAL SUMMARY

Frontend Developer skilled in React.js and modern JavaScript, currently expanding my knowledge of TypeScript. I am working as a Software Developer Intern at AmbuFast, where I focus on writing clean code and building easy-to-use web applications.

TECHNICAL SKILLS

Languages:	JavaScript (ES6+), TypeScript
Frontend:	React.js, HTML5, CSS3, Tailwind CSS, Responsive Design
Backend:	Node.js, REST APIs
Database:	MongoDB, Supabase, PostgreSQL
Tools:	Git, GitHub, VS Code, Cursor, Netlify, Vercel, Claude Code
AI:	Generative AI, Prompt Engineering

EXPERIENCE

Software Developer Intern *April 2026 – Present*

AmbuFast, Nagpur

Hospital Management System

- Developed reusable React.js components for healthcare applications, improving overall code maintainability.
- Built queue management and laboratory analytics modules.
- Collaborated with developers to test, debug, and optimize frontend performance.

JotFlow

- Built an approval-tracking dashboard using ReactJS, Node.js, and PostgreSQL to streamline workflows.
- Integrated Jotform API to automatically sync user form submissions into the platform.
- Engineered a real-time tracker to manage multi-step approvals from start to completion.

EDUCATION

G H Raisoni University 2023 – 2026

Bachelor of Computer Applications Sausar, Madhya Pradesh

Dr. Ambedkar College 2022 – 2023

Higher Secondary School (12th) Nagpur, Maharashtra

PROJECTS

Voice Command Stopwatch *Personal Project — 2025*

Technologies: HTML, CSS, JavaScript, Node.js, MongoDB

- Built a voice-controlled stopwatch using the Web Speech API.
- Added dark/light theme support.
- Integrated MongoDB to store and retrieve lap history.

Employee Management System *Personal Project — 2026*

Technologies: React.js, JavaScript, HTML, Tailwind CSS, LocalStorage

- Developed an employee management system with role-based access control.
- Enabled administrators to assign and monitor employee tasks.
- Implemented task status tracking.
- Built responsive dashboard interfaces using Tailwind CSS and LocalStorage.

Virtual Photo Booth *Personal Project — 2026*

Technologies: React.js, JavaScript, Tailwind CSS, LocalStorage, react-webcam

- Built a privacy-first app using react-webcam and LocalStorage, never saving user photos.
- Engineered dynamic 3-photo strip and 4-photo grid layouts with vintage and B&W filters.
- Designed an off-white UI with Tailwind, using precise semantic class names for clean code.
